2K Diffuser Beads and Unbreakable Nug Jars are the first two Klever Kreation's produced by our company. Diffuser Beads cool down and separate the smoke in your water pipe, making it a smoother hit and less harsh in your throat. It acts as a percolation chamber that you can add to any bong or glass or glass bubbler. If you've ever needed a container to carry your tobacco or bud in, our unbreakable nug jars are perfect for throwing in your bag. They are waterproof, smellproof, and have a latch tight lid, so it will never spill.
